Tallahassee, FL 32317

## ROSS Preliminary Inventory Report

Pursuant to Section 161.144, Florida Statutes, the Legislature has mandated that the Department of Environmental Protection (FDEP) "...shall develop and maintain an inventory of identified offshore sand sources as part of the regional elements of its comprehensive long-term beach management plan. Offshore sand sources in state or federal waters which are identified for potential, proposed, or permitted use shall be clearly mapped or otherwise noted and readily available for public review".

A Preliminary Inventory Report organized by Borrow Area type and subdivided by county is presented here. The Report lists in tabular format selected information from the ROSS Oracle database. This information includes county name, Project Name, Project Date, Project ID, Report Date, JCP#, Borrow Area Name, Borrow Area ID, Polygon Centroid lat/long coordinates, and descriptive information on the location of the borrow area.

Sand sources will be categorized as potential, proposed or permitted in accordance with its current designation on ROSS.

The system-generated preliminary inventory report will be converted to a .pdf file, posted on the ROSS web site and made readily available for public review through a link on the home page of ROSS. FDEP will also provide a link to the inventory report on the BBCS web site. The published inventory will be periodically updated by URS as authorized work under the existing contract Task Assignment #5 for ROSS maintenance and geotechnical services.

# ROSS Preliminary Inventory Report

## Field Definitions

*County* – The county off which the borrow area is located. This is not related to jurisdictional status.

*Project Name* – The name of the project for which the borrow area was determined.

*Project Date* – The date of the actual project.

*Project ID* – A ROSS internally generated discrete identification number assigned to allow for easier searching.

*Report Date* – The date the report was completed.

*JCP#* - The FDEP Joint Coastal Permitting section's permit number assigned to a specific borrow area.

*Borrow Area Name* – The name assigned to a particular borrow area. This field may match information in the Borrow Area ID field.

*Borrow Area ID* – An identifier for a particular borrow area.

*Polygon Centroid* – A latitude/longitude coordinate located in the center of the borrow area polygon. Used for locational purposes.

*Borrow Area Location* – A written description of the location of the centroid of the borrow area. This is based off bearing and distance from a Florida Range Monument located nearest to the borrow area.
